

UHMWPE Crane Outrigger Pads

Standard size and selection data sheet

Technical Data

Material	UHMWPE
Standard size range	300 x 300 mm to 800 x 800 mm
Thickness range in standard chart	40 / 50 / 60 / 70 / 80 mm
Surface options	Smooth or anti-slip pattern
Handling options	Rope / molded-style carry handle options
Processing	Cutting / drilling / CNC machining / rounded corners

Key Features

- Helps distribute concentrated outrigger loads over a larger ground area.
- Suitable for cranes, concrete pumps, bucket trucks, aerial lifts and other stabilizer / outrigger applications.
- Final selection should consider actual outrigger reaction, foot size and ground bearing conditions.

For quotation / selection

Please send equipment model, maximum outrigger reaction or equipment data, outrigger foot dimensions, ground condition, required pad size and quantity.
